PROJECTS

everNote - Notebook on cloud

- EverNote is a powerful note-making application designed to help you stay organized and capture your thoughts and ideas effortlessly. With a sleek and intuitive user interface built with React, a robust backend powered by Node.js and Express, and a reliable MongoDB database hosted on MongoDB Atlas, EverNote offers a seamless note-taking experience.
- Features : 1. Create, Read, Update, and Delete 2. Title, Description, and Tags 3. Seamless Synchronization 4. User-Friendly Interface.

Portfolio Website

- A website about my portfolio which will let people know more about me, my experiences and my coding journey till the date
- Made with React and Three.js
- <https://aniket-portfolio-4c631.web.app/>

Ideaplots website design and development

- Designed website prototype for Ideaplots, a leading design agency. Utilized Figma to create a visually appealing platform showcasing their web development and design services.
- <https://ideaplots.com>

IEI website design and development

- Designed a figma website prototype for IEI-FCRIT, a college club, showcasing events, team, and initiatives. The platform serves as a central hub for members and visitors, facilitating exploration of club activities and fostering community engagement.
- <https://iei-fcritmech.in/>

ETAMAX website design and development

- Designed a website for the student council to manage event bookings, enabling student registration and participation. The platform streamlined event management processes, fostering seamless booking and engagement.

Brewing illusions

- Brewing illusion is a portfolio of a 3D modeler which i made for my client. It's a platform designed to showcase his skills, achievements, and passions, while also offering a glimpse into who a person is as an individual and his work.
